Ok thanks. Bottom line note that DTSC is planning to use SCRIBE for their upcoming Excide work. We are going to hold a training on 8/9 in SF hopefully that will assist them and us. MM

Hey Matt – yes our air data from Fruitland is in SCRIBE. Also we've briefed DTSC on SCRIBE, data management and web viewers in the context of their Excide planning efforts. We can probably point your contact in the direction of the DTSC data people we've been working with.

Steve has been our Excide point person w DTSC so he can followup with you.

Thanks

Hi Harry – do you know if you are using SCRIBE software for sample management at Excide. The state has approached me to use it for their excide work and I thought that perhaps if ER was already using it, there might be a connection btn you and them. MM
